## Quantum-Systems to open new regional hub in Brisbane, Australia

The new location will serve both government and commercial customers in the Asia-Pacific region.

**Brisbane, Australia and Munich, Germany – July 25th, 2022** – (Business Wire) Quantum-Systems GmbH, innovative developer, designer, and producer of advanced eVTOL UAVs today announced that it has incorporated a wholly owned subsidiary in Brisbane, Australia. The formation of Quantum-Systems Pty. Ltd, also known as Quantum-Systems Australia, follows the stand-up of [Quantum-Systems Inc](#) in the United States in January of this year to serve the Defence and Security market in North America.

The new regional hub is a result of rapidly growing interest in Quantum-Systems technology and products and business opportunities with Defence and Security customers in the Asia-Pacific (APAC) region. The new business is also enabled and supported by a close relationship between Quantum-Systems and Rheinmetall Defence Australia.

## New hub leverages relationship with Rheinmetall Australia

Quantum-Systems Australia will be located in the immediate vicinity of the campus of Rheinmetall's Military Vehicles Centre of Excellence and will house production, R&D and support facilities as well offices for executive, sales and administration staff.

Initially Quantum-Systems Australia will primarily serve Government clients in the region, but in due course will also serve the commercial business division, with its extensive distribution network in Asia Pacific, and the many hundreds of customers in the region already using Quantum-Systems' industry-leading eVTOL technology.

*"Establishing a foothold in Australia is the next logical step for us to move closer to our goal as the world's leading sUAS manufacturer for governments and commercial.*

*The new business is part of our growing global business and will serve as a regional base for sales and support services to Defence & Security customers in the region, as well as servicing commercial customers using our industry-leading eVTOL technologies.*

*We are also pleased to announce a strategic partnership with Rheinmetall Defence Australia, who have offered additional support in the growth and development of this new venture."*

**Florian Seibel** - CEO, Quantum-Systems GmbH

Quantum-Systems Australia will begin hiring talent locally, establishing partnerships and pursuing opportunities and new markets in Australia and the wider Asia Pacific region.

### About Quantum-Systems

Quantum-Systems GmbH develops and deploys small Unmanned Aircraft Systems (sUAS) for the geospatial community (commercial product line) and the defence, security, and intelligence community (governmental product line), providing unprecedented data quality, efficiency, and operational usability.

The fully autonomous sUAS with AI edge computing capabilities enable its users to capitalise on the emerging megatrend of autonomous sUAS data acquisition solutions that will open entirely new markets and applications. All Quantum-Systems sUAS combine eVTOL (electrical vertical take-off and landing) capabilities with long-range utilising electrical and aerodynamic efficiency.

The continuous integration of state-of-the-art sensors into the systems allows for increased aerial data intelligence.
