INDUSTRY DOCTORAL PROGRAM

INDUSTRY DOCTORAL PROGRAM

MONASH INNOVATION LABS

Gain a competitive edge by investing in research

The Industry Doctoral Program (IDP) is a unique doctoral research program which allows organisations to determine the size, scope and research focus of each project.

The IDP allows your business to explore new ideas and opportunities whilst gaining access to some of Australia's leading STEM research talent. Or if you're looking to keep your talented employees committed to your business, you can enrol them to foster innovation and their own development.

The IDP also provides opportunities to utilise Monash world leading facilities and infrastructure, including the Monash Innovation Labs and Smart Manufacturing Hub.

Doctoral candidates will be immersed in their sponsor organisation, allowing them to gain a deeper understanding of the business goals, and its impact on their research. In contrast to a PhD, their work will be assessed based on a portfolio of their industry reports.

BENEFITS TO YOUR ORGANISATION

- Undertake organisation specific research
- Access Monash University's world leading infrastructure and expertise
- Be a part of the purpose built Monash Innovation Labs fostering research talent to deliver impact to industry
- Engage the best doctoral candidate for your project with Monash selection, academic guidance and support
- Build your talent pipeline or invest in your own organisational talent
- Receive new insights and findings periodically - so you can deploy and scale at speed

“ *I would recommend the Industry Doctoral Program to any business as the Monash IDP candidates are of the highest calibre and contribute such value to our projects through their knowledge and problem solving skills.* **”**
