## INDUSTRY INNOVATION PROGRAM

### MONASH INNOVATION LABS

#### Engage with Monash talent to solve your business challenges

Keen to seize a business opportunity? Need fresh perspective to tackle an emerging challenge? Or seeking additional talent to investigate your project?

The Industry Innovation Program (IIP) is a unique on-campus innovation project that allows industry to explore opportunities and ideas in a purpose-built collaboration space.

The IIP provides you with the right mix of students and a dedicated supervisor to suit your project, timelines and organisational culture. With the program offered over 3, 6 or 12 months, either full time or part-time, the IIP is your path to a competitive advantage.

#### BENEFITS TO YOUR ORGANISATION

- Access a pipeline of talented STEM students who will be embedded in your organisational culture
- Scope your project and approach with the guidance of engineering experts
- Access Monash University's world leading infrastructure and expertise
- Project access to the Monash Innovation Labs, featuring Monash Smart Manufacturing, Smart Processing, analytical labs and large scale 3D printers.
- Select students for your project with assistance from Monash's rigorous screening process
- Minimal supervision required from your business as students are based at Monash

**“** *The Industry Innovation Program has been hugely beneficial to our company and mission. We have been able to accelerate development of new products, have dedicated resources focused on this part of our business, access to the Makerspace and experts at Monash University. The students have been very engaged and dedicated. The program itself is so flexible as it allows us to set up the objectives, timelines and tasks to suit our company and product. ”*
