

ACS-A is an innovative engineering and manufacturing organisation, with a reputation for taking on challenging projects. ACS-A specialises in design, manufacture, testing and repair of light-weight, composite structures. With over 30 years of experience in product development, ACS-A is your ideal Defence partner to deliver composites solutions.

Design Analysis Manufacture Test Repair

Product Development | CNC Machining | Furnaces | Filament Winding

- ▶ Manufacture of Ultra-High Temperature Composites
- ▼ Build of Aerial Camera Housing

- ◀ Manufacture of carbon fibre UAVs for Defence research

Differentiators

- Full spectrum from design through to manufacture all in one partner.
- Structural optimisation, impact and crash simulation capabilities.
- Manufacture of ultra-high temperature composite (UHTC) structures for hypersonic and space applications.
- Proven record of delivering products to Defence for over 30 years.
- 100% Australian owned and operated.
